OBJECTIVE

Computer Science undergraduate seeking a Data Science Internship with focus on machine learning model development, exploratory data analysis, computer vision, and healthcare AI. Skilled in Python, TensorFlow, OpenCV, Convolutional Neural Networks (CNN), Generative AI, and data visualization. Hands-on experience building end-to-end machine learning pipelines, medical imaging workflows, and AI-powered applications.

TECHNICAL SKILLS

Programming Languages: Python, SQL, C, C++, Java

Machine Learning and AI Frameworks: TensorFlow, PyTorch, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Plotly, Streamlit

AI and Deep Learning: Convolutional Neural Networks (CNN), Recurrent Neural Networks (RNN), Generative Adversarial Networks (GANs), Large Language Models (LLMs), Visual Language Models (VLMs), YOLOv8, Multimodal AI, Generative AI

Data Science and Analytics: Exploratory Data Analysis (EDA), Feature Engineering, Hyperparameter Optimization, Statistical Modeling, Data Cleaning, Data Visualization, Business Intelligence, Power BI, DAX, Power Query

Other Tools and Technologies: REST APIs, HTML, CSS, Microsoft Excel, Natural Language Processing (NLP), Prompt Engineering

PROJECTS

DermaVision AI – Healthcare AI Skin Disease Detection System

Python, TensorFlow, OpenCV, Scikit-learn, CNN, Computer Vision | [GitHub](#)

- **Developed** a Convolutional Neural Network (CNN) based deep learning pipeline for automated classification of skin diseases from unstructured medical image data, supporting AI-assisted early diagnosis in the healthcare domain.
- **Built** an end-to-end machine learning data pipeline covering image preprocessing, normalization, data augmentation, and feature engineering to improve model performance on imbalanced medical imaging datasets.
- **Performed** model training, cross-validation, and hyperparameter optimization using TensorFlow; evaluated performance using accuracy, precision, recall, and F1-score metrics.

Life Expectancy Analysis – Exploratory Data Analysis and Visualization Dashboard

Python, Streamlit, Pandas, Matplotlib, Seaborn, Plotly, Power BI | [GitHub](#) | [Live Demo](#)

- **Conducted** in-depth exploratory data analysis (EDA) on structured WHO health dataset (2,900+ records, 22 features) covering time-series health trends across 193 countries from 2000 to 2015.
- **Applied** feature engineering, outlier treatment, missing value handling, statistical analysis, and regression modeling; visualized results using Matplotlib, Seaborn, and Plotly to identify key health predictors.

GlowAI – Multimodal Generative AI Application (Team Project)

Gemini 1.5 Flash API (Multimodal LLM), Web Speech API, Prompt Engineering | [GitHub](#) | [Live Demo](#)

- **Collaborated** in a team to develop a multimodal AI application integrating a Large Language Model (LLM) with image analysis capabilities to deliver AI-powered skincare guidance via text, voice, and image interaction.
- **Applied** prompt engineering and instruction-based fine-tuning techniques to structure safe, accurate model responses; integrated Gemini 1.5 Flash API for multimodal AI inference with fallback model handling.

India Health Insights – Healthcare Business Intelligence Dashboard (NFHS-5)

Power BI, DAX, Power Query, Data Visualization | [LinkedIn Post](#)

- **Developed** an interactive Power BI healthcare analytics dashboard on India's National Family Health Survey (NFHS-5) dataset; performed data cleaning, preprocessing, and transformation using Power Query.
- **Created** DAX measures for dynamic calculations; built visualizations revealing regional disparities in anaemia rates, vaccination coverage, sanitation, and child mortality across structured health data.

CERTIFICATIONS

Generative AI – NASSCOM (2026) | **Programming Using C++** – Infosys Springboard (2025)

Python Programming (Basic to Advanced) – CSE Pathshala (2025) | **Full Stack Web Development** – GeeksforGeeks (2025)

EDUCATION

Bachelor of Technology in Computer Science and Engineering – Lovely Professional University 2024 – 2028

Current CGPA: 8.36

Intermediate – Class XII – DAV Public School | 85.6% 2021 – 2023

Matriculation – Class X – Nath Public School | 78% 2020 – 2021
